Summary

A Full Stack Web Developer, with over 8 years of medical software experience in EMR and EPM. Collaborating with small and large teams, while using leadership and communication skills to improve workflow.

Experience

2019-05

Front-end Teacher Assistant

CareerSource/Wyncode

- Assisting students during and after class for 20 women who are starting their careers as front-end developers in partnership with Wyncode and CareerSource.
- Explaining and breaking down any questions regarding HTML, CSS, JQuery, JavaScript, and React.
- Grading assignments on a weekly basis and review fundamental programming concepts with individual students.
- Maintaining and creating proper Linux-based development environments for all students with open-source tools such as Ubuntu through command.

2018-09 - 2018-11

Freelance

- Developed a custom front-end HTML, CSS, and React.js to make a Shopify mocked website.
- Analytical thinking, and problem-solving to deliver a project in 3 days.
- Proper documentation using source tree/ git hub and screenshots to match documentation.
- Consistently practiced quality assurance, while using tools given by the client for organizations and ensuring customers' requirements.
- Understanding and reading documentation of ray casting for a maze game idea requested by the client.

2018-07 - 2018-08

Projects

On The Fly:

- Designed a React web app project with a small developing team that allows you to pick current events in your area for a date night or friend outing.
- Connected to the ticket master API to render events in the area in a 10 miles radius using a zip code or current location.

Quik Connect:

- Designed a Ruby on rails web app project with a small developing team that allows you to send your business or social media accounts information by text or email.
- Used Twillo API to allow the user to enter a number in the phone number in the input field, which sends a text message with selected accounts the phone entered.
- Used the Action Mailer to allow the user to enter an email address in the input field, which sends an email with selected accounts to email address entered.
- Devise for user Authentication, which allows the user to create a Profile by logging in and out .
- ActiveRecord Association allowing a user to have one profile but many social and business accounts.

Education

2018-05 - 2018-09

Wyncode

- Certificated Full Stack Web Developer.
- Complete 350 hours of staffed learning, write 5,000 lines of code.
- Creating 2 functional web apps.
